

Test 3

READING AND USE OF ENGLISH (1 hour 15 minutes)

Part 1

For questions 1–8, read the text below and decide which answer (A, B, C or D) best fits each gap. There is an example at the beginning (0).

Mark your answers on the separate answer sheet.

Example:

0 A highly B historically C greatly D widely

0	A	B	C	D
	☐	☐	☐	☒

What's so great about garlic?

Used (0) in cooking around the world, garlic is not only delicious, but has health benefits, too. In the same family as onions and leeks, its (1) powerful flavour is both loved and hated.

Garlic has been cultivated for thousands of years and is (2) to Central Asia and Iran. There are hundreds of varieties, and it is now grown all over the globe (3) to the ease with which it can be cultivated. The garlic that many of us are (4) with is a rounded bulb with several parts which can be (5) from each other and peeled before cooking.

The vegetable has historically been used both in cooking and in medicine. It was used traditionally in ancient cultures to (6) the productivity of labourers, and even today is used to help improve sporting (7) It is nutritious – containing vitamins and minerals – and has been proved to be effective in (8) blood pressure. It may also be helpful in fighting the common cold.

- | | | | | |
|---|-----------------|---------------|----------------------|---------------|
| 1 | A individually | B originally | C characteristically | D exclusively |
| 2 | A native | B domestic | C local | D natural |
| 3 | A corresponding | B relating | C owing | D referring |
| 4 | A knowledgeable | B familiar | C informed | D experienced |
| 5 | A separated | B moved | C sorted | D halved |
| 6 | A progress | B expand | C deepen | D increase |
| 7 | A function | B performance | C fortune | D production |
| 8 | A declining | B limiting | C lowering | D descending |

Part 2

For questions 9–16, read the text below and think of the word which best fits each gap. Use only **one** word in each gap. There is an example at the beginning (0).

Write your answers **IN CAPITAL LETTERS** on the separate answer sheet.

Example:

0

A	S																
---	---	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--

What is 'flow'?

Flow, (0) psychologists describe it, is the state of being completely absorbed in what you're doing. The task at hand (9) be anything from carrying out an interesting study project (10) doing a creative pursuit like painting, or taking part in a sports activity. Research shows that people experiencing flow are unaware of the world beyond the activity in (11) they are deeply involved at the time, and later report feeling that time passed by quickly. They also say they found the task was easy and enjoyable.

During flow, people sometimes forget to eat, appear (12) to be able to hear, or fail to notice things happening around them. They also continue with what they are doing (13) the fact that they are feeling tired. Psychologists (14) of the opinion that flow allows us to temporarily switch (15) from everyday concerns. Although there are some people who may struggle to achieve flow, almost (16) of us can learn how to do so.

Part 3

For questions 17–24, read the text below. Use the word given in capitals at the end of some of the lines to form a word that fits in the gap in the same line. There is an example at the beginning (0).

Write your answers **IN CAPITAL LETTERS** on the separate answer sheet.

Example:

0	I	N	V	E	N	T	O	R										
---	---	---	---	---	---	---	---	---	--	--	--	--	--	--	--	--	--	--

Eli Whitney and the cotton gin

Eli Whitney (1765–1825) was the American (0) of the cotton gin. This was a machine which divided cotton seed from cotton fibre, thus revolutionising the cotton industry. Previously, the separation had been done by hand, but with Whitney's machine, it was done (17) , and this made cotton production much more (18)

INVENT

**AUTOMATIC
PROFIT**

However, Whitney and his business partner began making money from the machine in a way which made them highly (19) They would process a farmer's cotton and in return demand two-fifths of the money made when the cotton was sold. This aroused widespread (20) among cotton farmers, who then looked for alternatives to Whitney's machine. Similar machines soon made their (21) on the market. In 1798 Whitney made his initial (22) for a patent or legal ownership for his design. However, for a (23) of reasons, it was not until 1807 that his patent finally received legal (24)

Test 3

Part 4

For questions **25–30**, complete the second sentence so that it has a similar meaning to the first sentence, using the word given. **Do not change the word given.** You must use between **two** and **five** words, including the word given. Here is an example (0).

Example:

- 0 A very friendly taxi driver drove us into town.

DRIVEN

We a very friendly taxi driver.

The gap can be filled by the words 'were driven into town by', so you write:

Example:

0	WERE DRIVEN INTO TOWN BY
---	--------------------------

Write **only** the missing words **IN CAPITAL LETTERS** on the separate answer sheet.

- 25 It was no surprise when Jane got a promotion.

EXPECTED

It get promoted.

- 26 Paul spent a long time trying to decide what to do.

AGES

It took Paul his mind what to do.

- 27 I didn't know you were going to the party, otherwise I'd have gone too.

IF

I'd have gone to the party too you were going.

- 28** What time do they arrive at their hotel tonight?

GETTING

When their hotel tonight?

- 29** Lucy was looking forward to seeing what Jon looked like in his new suit.

WAIT

Lucy what Jon looked like in his new suit.

- 30** I regret spending such a lot of money on a new phone.

SO

I wish I money on a new phone.

Part 5

You are going to read an extract from a magazine article about a man bringing up wild turkeys. For questions 31–36, choose the answer (A, B, C or D) which you think fits best according to the text.

Mark your answers on the separate answer sheet.

It's a bird's life

Joe Hutto describes his experience of bringing up wild turkeys

I started adopting young animals while still a child myself. Many were orphaned newborns, which meant I 'mothered' various creatures – raccoons, squirrels, foxes, whatever came my way. I felt the animals preferred my company to that of members of their own species, and several injured ones even slept in my house, much to my family's irritation. At the time, I thought I'd come across a sort of wonderful magic; but after years of studying animal behaviour, I learned about 'imprinting' – young creatures becoming attached to the first moving object they encounter.

Years later I had a bowl full of wild turkey eggs thrust at me by an angry local tractor driver who'd almost driven over them. I had to act fast, finding an incubator at short notice to keep the eggs warm, and then turning them twice a day, as a quick online search explained a turkey hen would do. I'd regularly 'vocalize' at them to get the eggs accustomed to my voice. I recreated the putt and purr noises nesting wild turkeys make, having found some examples on the internet. I felt rather foolish, frankly, but after about a week, I started to hear peeped responses, and the first tiny beak broke through. The first baby turkey, or poult, to emerge responded immediately to my voice,
line 27 raising his wet head to look me straight in the eyes. Then he pressed his face against mine and quickly fell asleep. After a few days, I found I had a new family of sixteen wild turkeys.

I built a pen to protect my flock from predators, complete with tree limbs for them to roost (that's to say, sleep on); at ten days old, they could already fly. I spent a lot of time in the pen myself. The poults would expect 'Mom' to be waiting when they emerged from their roosts before dawn, and I was always present at dusk until every single one was asleep. During the day we explored the surrounding countryside. I quickly became familiar with each bird's distinctive personality: Little Friend, who always wanted to be alongside me; Sweet Pea, who adored being held and stroked. They were

fascinated by every new thing they encountered, but also had individual interests: Rosita was drawn to squirrels, Turkey Boy to turtles.

Wild turkeys are born with an extensive language. One expert has identified and recorded about 30 calls. I became familiar with those sounds and their meanings and could give a 'lost' call that other members of the family would respond to, or an 'assembly' call that brought the whole flock dashing back to me. But while living as a turkey, I discovered their communication was far subtler than I'd realised. We encountered various predators as we explored, and I was soon able to hear the different inflections they made to identify various species. Over time, I got better at making those sounds myself. After six months, I no longer felt like the bad singer in the choir, though occasionally I'd miscall and get a very different reaction from the one I'd anticipated. I sometimes felt acute embarrassment at how I must appear to them. My aim was to blend smoothly with the rest of the flock, but I felt they saw me as intellectually lacking.

The project lasted two years. The turkeys grew fast, but our separation began when they started roosting in trees outside their pen. I felt relief at having kept them alive long enough for them to become independent, but robbed of the hours I could no longer spend as part of the group. What were they saying up there? Eventually, they all struck out on their own and, though individuals occasionally visited, I had no direct contact with the next generation. I'd surrendered myself completely to their world, but then had to learn, reluctantly, to let go.

It's a common misconception that turkeys are stupid. From the moment they hatched, my wild turkey family demonstrated wonder, joy in life and an innate understanding of every other creature inhabiting their world. They taught me the value of trying to live in a state of true wakefulness. They have no choice but to live in the moment.

- 31 The writer says that when he was a child, he
- A was concerned about endangered species.
 - B believed he had a special bond with wildlife.
 - C favoured spending time with animals over his own family.
 - D became skilled at curing sick animals.
- 32 Why does the writer use the phrase 'straight in the eyes' in line 27?
- A to emphasise how near the poult was to him
 - B to underline the unusual appearance of the poult
 - C to highlight how threatened he felt by the attitude of the poult
 - D to stress the intensity of the connection between him and the poult
- 33 What point does the writer make in the third paragraph?
- A The turkeys demanded more from him than he could offer.
 - B It was hard to distinguish the turkeys from each other.
 - C The turkeys displayed a lot of curiosity about their surroundings.
 - D He had to work hard throughout the day to keep the turkeys safe.
- 34 When discussing the extensive language of turkeys, the writer
- A is convinced the turkeys approved of his communicative efforts.
 - B shows great pride in how much of it he learned to produce.
 - C compares his early attempts at it to that of a poor musician.
 - D questions the findings of a previous researcher.
- 35 How does the writer say he felt towards the end of the project?
- A confused by the behaviour of the turkeys
 - B surprised the turkeys had avoided any dangers
 - C defeated by the stress of looking after the turkeys
 - D sad at the change in his relationship with the turkeys
- 36 What is the writer implying in the final paragraph?
- A Humans could benefit from copying one aspect of turkeys' behaviour.
 - B Turkeys work hard to get the most out of their environment.
 - C Most people know hardly anything about the life of turkeys.
 - D Turkeys are unable to adapt to changing circumstances.

Part 6

You are going to read a magazine article about an unusual skiing trip. Six sentences have been removed from the article. Choose from the sentences **A–G** the one which fits each gap (37–42). There is one extra sentence which you do not need to use.

Mark your answers on the separate answer sheet.

The world's first Zeppelin ski-drop

Three winter sports enthusiasts use a huge airship to reach a mountain top

To ski down a mountain, first you have to reach the top. Human ingenuity has devised many solutions, including the first basic cable-car system in 1644, and much more recently heli-skiing – literally jumping out of a helicopter onto the start of a ski-run in what is known as a ski-drop. But could it be done in a more environmentally friendly way?

Snowboarder Fabian Lentsch and skiers Andreas Gumpenberger and Stefan Ager had a dream. They wanted to ski from the 2,233m summit of Austria's Kleiner Valkastiel without contributing to climate change. **37** What they came up with was the world's first ever ski-drop which used a large, gas-filled airship: a Zeppelin.

In the early part of the 20th century, Zeppelins had ruled the skies. The giant airships could cross oceans at speeds of around 84kph, sleeping more than 70 occupants in luxury, even during relatively bad weather. **38** By 1914, over 10,000 fare-paying passengers had travelled on upwards of 1,500 Zeppelin flights, but by the 1940s Zeppelins had fallen out of favour.

Nevertheless, the Zeppelin was the mode of transport that the adventurers decided would be perfect for their mission. They were all used to ambitious ski expeditions, having previously skied down a 6,000m mountain in Pakistan, and on one occasion taken a hot-air balloon to a summit. Tackling the Kleiner Valkastiel peak came with its own issues, not least of which were its unstable weather conditions. **39** In 2000, the centenary of the first Zeppelin flight had been celebrated with the birth of a prototype Zeppelin NT (New Technology).

These new versions are only intended to fly to an altitude of 1,000m. Kleiner Valkastiel's height is more than twice that. However, in 1929, during the longest leg of a round-the-world trip, bad weather had forced an original Zeppelin to deviate from its route and fly over a Siberian mountain range. This involved an ascent to 1,800m, which had proved no problem even for the older type of airship. **40** The risks at such a height are immense, though: storms, turbulence and air pressure changes could destroy the fragile vessel.

It took two years of careful planning before the engineers and pilots associated with the project were satisfied. Any surplus weight needed to be abandoned. 'We had to spare every kilogram we could,' says Ager. Conditions also had to be perfect: very cold, no wind, clear weather. **41** Finally, though, on a bright, still, -5°C morning in February, those conditions were met, and their airship set off.

The initial journey was calm and uneventful. But, as the vessel neared the Kleiner Valkastiel's peak, the real challenge began. There's one crucial difference between using a helicopter and a Zeppelin: manoeuvrability. In most cases, helicopters are able to land at the top of ski runs, or at least hover close enough for a skier to hop out. **42** 'When the narrow hatch opened, there was at least 60m of air beneath me,' notes Gumpenberger. 'All I could see was snow and rocks.' At that height, even in good conditions, the Zeppelin was constantly moving, buffeted by even the slightest wind. The only option was to slide down on ropes – fast.

The trip down the mountain proved harder than the ride up. But that's a story for another day.

- | | |
|---|---|
| <p>A No such luck with a 75m-long airship.</p> <p>B The sportsmen therefore felt that reaching the slightly greater summit of Kleiner Valkastiel using a modern one was possible.</p> <p>C There was no way they could have predicted that.</p> <p>D This was going to need some radical thought.</p> | <p>E In fact it was near impossible to find a suitable day to achieve the necessary height.</p> <p>F Locating an airship was less of a problem, however.</p> <p>G The later ones even had a dining room and grand piano.</p> |
|---|---|

Part 7

You are going to read an article about people's experiences of going to music festivals. For questions 43–52, choose from the festivals (A–E). The festivals may be chosen more than once.

Mark your answers on the separate answer sheet.

Of which festival does an audience member say

the schedule kept to time throughout the event?	43	
one feature of it proved rather disappointing, making a repeat visit unlikely?	44	
acts had been chosen that could cope without a large stage?	45	
there were a few minor problems during the event?	46	
there was a lack of places provided at the venue for people to stay overnight?	47	
the performers were based in the same country?	48	
the mixed music programme appealed to a wide range of people?	49	
it offered art forms other than music for spectators to enjoy?	50	
one effect of the location was that it was hard to get enough rest?	51	
the organisers tried to ensure those attending had things they might need?	52	

Festival experiences from around Europe

*We asked how our readers enjoyed this summer's music festival season.
Here are some of their memories.*

A Canary Wharf Jazz Festival, England

The Canary Wharf Jazz Festival is a free two-day jazz music event held each August in London. The various singers and musicians, many of whom have received music industry awards, are all working in the UK, and from my point of view this gives the festival something of a local atmosphere. I went with my partner and 14-year-old daughter and we found the environment very family-friendly. The audience have to travel in every day as there isn't anywhere allocated to camp. The people arranging the event are very helpful and even hand out picnic mats to anyone who hasn't brought their own. One year when it started to rain, they even offered everyone plastic raincoats! This year was the Canary Wharf Jazz Festival's tenth anniversary and it was very well attended, so it's clearly doing something right. I'll certainly be back next year.

B Llangollen Festival, Wales

I'm from a village just a few miles away from Llangollen in north-east Wales, where a festival called the Llangollen International Musical Eisteddfod is held every year. I was working there this year. I'm part of the sound crew on the main stage, a job which I've continued to do every year since I tried it in my last year at school as work experience. The festival is generally well organised, although I was aware of one or two slight issues with the running this year as with any festival of its scale. Some people come for the wide variety of poetry competitions during the daytime, while for others the evening concerts are the main attraction. Other people just come for the stalls, performances on the outside stages, or the general buzz of all the international competitors. The best experience is definitely working with the rest of the sound and backstage crew during the festival. In addition, meeting people from so many different countries is brilliant. I'll certainly be doing it again!

C Hideout Festival, Croatia

This year was my first time at Hideout Festival. Thousands of British people head to the small island of Pag in Croatia every summer to hear the best DJs on the planet. The focus is on dance, and it felt like most people had come to listen and enjoy the atmosphere and the parties, rather than to see one specific act. The festival was really well organised. The combination of the beach and guaranteed warmth and sunshine made for a great experience. I thought it was a real shame it was nearly all British people attending though. I'd hoped it might feel a little more cosmopolitan. So, rather than putting it on the calendar for next year, I'd really prefer to try out some other festivals in Croatia.

D Benicàssim Festival, Spain

I went to the Benicàssim Festival with a group of friends and camped on site. Many festivals have horrendous problems with performances overrunning, but not this one – everything ran like clockwork. As a keen photographer, I was inspired to join my friends by the opportunity to photograph big name acts. Muse were a highlight; however the likes of The Chemical Brothers and Massive Attack also provided some pretty spectacular live shows. The weather itself was both the best and the worst thing. You could spend most of the day at the beach before the music started. It got a little cooler in the evening, which was perfect, but the high temperatures made spending the night in a tent challenging.

E Bristol Sounds, England

I went to the Bristol Sounds for the first time this summer. With such a variety of music on offer it attracted different crowds, and I was able to enjoy each night as a kind of stand-alone mini festival. The arching shape of the venue amphitheatre just seemed to lock the sound in with us, under the stars, by the water's edge. The size of the venue was limited, but it was obvious the organisers had picked bands that would fit the space well.

Test 3

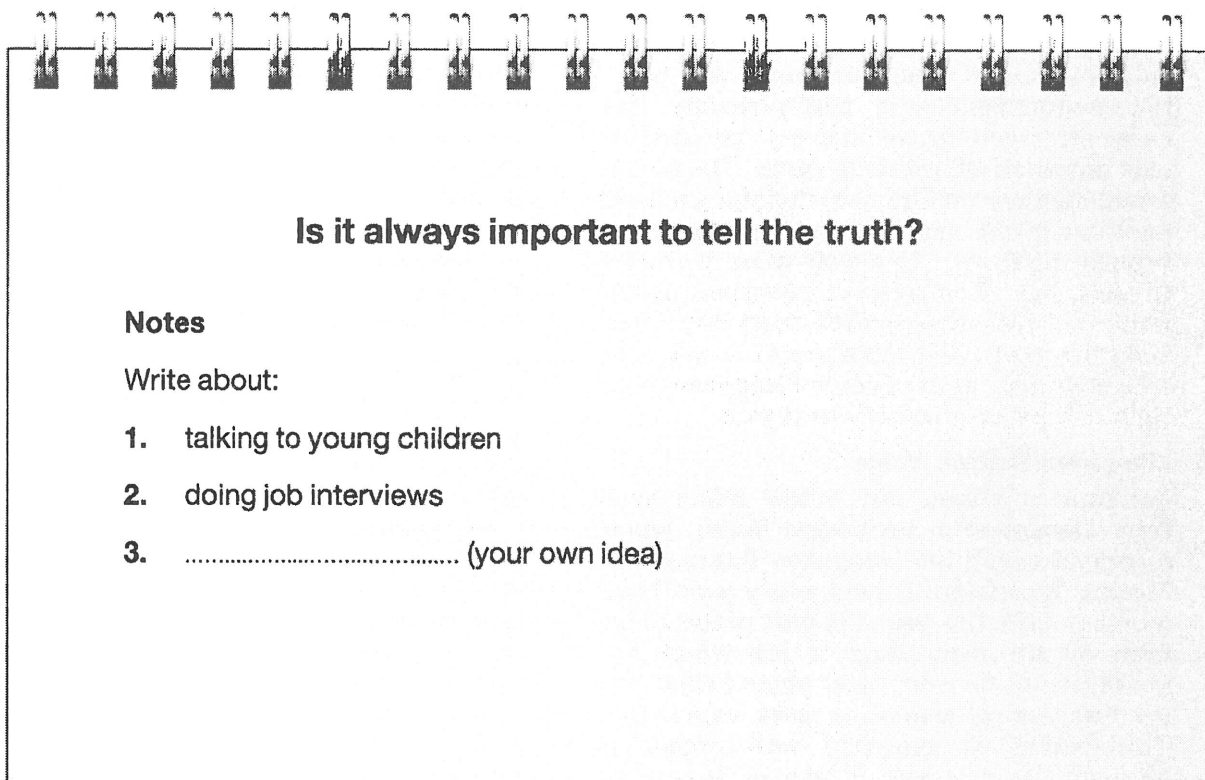

WRITING (1 hour 20 minutes)

Part 1

You **must** answer this question. Write your answer in **140–190** words in an appropriate style on the separate answer sheet.

- 1 In your English class you have been talking about being honest. Now, your English teacher has asked you to write an essay.

Write your essay using **all** the notes and giving reasons for your point of view.

Is it always important to tell the truth?

Notes

Write about:

1. talking to young children
2. doing job interviews
3. (your own idea)

Part 2

Write an answer to **one** of the questions **2–4** in this part. Write your answer in **140–190** words in an appropriate style on the separate answer sheet. Put the question number in the box at the top of the answer sheet.

- 2 You see this announcement on an English-language website.

Articles wanted

Living in another country

If you could live in another country, where would you choose to live, and why?

What would you miss most about where you live **now**?

The best articles will be published on our website.

Write your **article**.

- 3 You are the leader of a local group that has started making a 'nature garden' for the community on some unused land in your town. This garden is being paid for by the local council. The council has asked you to write a report to update it on the project's progress.

You should include information about:

- the progress made so far
- the problems you still have to solve
- when you think the project will be finished.

Write your **report**.

- 4 This is an email you have received from an English friend, Jo.

Subject: Advice please!

Hi

My young teenage cousins are coming to stay with me and my family for a few days soon, so I'm thinking about how to entertain them while they're here. I don't want them to be bored! We could either go on a camping trip to the coast, or do some things together here in the city. Where do you think I should take them?

Jo

Write your **email**.

Test 3

LISTENING (approximately 40 minutes)

Part 1

You will hear people talking in eight different situations.
For questions **1–8**, choose the best answer (**A**, **B** or **C**).

Listening test audio

- 1** You hear two people talking about when they became vegetarians.
What did they both find helpful?

 - A** learning about the health benefits
 - B** experimenting with new types of food
 - C** giving up certain foods gradually
- 2** You hear a man talking on the radio about writing his first published novel.
What does he say he was unaware of at the time of writing?

 - A** how determined he would need to be
 - B** how long it would take him to finish it
 - C** how many mistakes he would make
- 3** You hear a housing advisor talking about choosing flatmates.
What does she think is the most important thing to consider?

 - A** how much time you'll spend together
 - B** what each other's daily timetable is
 - C** how the housework will be shared
- 4** You hear a radio presenter talking about butterflies.
What is she doing?

 - A** encouraging people to create better habitats
 - B** making a comparison between different species
 - C** providing an explanation for low numbers

- 5 You hear a man talking about a local shop.
What has changed there recently?
- A the range of goods on offer
 - B how efficient the service is
 - C its popularity with customers
- 6 You hear a student talking to a careers advisor.
What is she seeking advice about?
- A how to put a decision she's made into practice
 - B how to ensure that she's making a good decision
 - C how to deal with her family's opposition to a decision
- 7 You hear two students talking about a science lecture they've just been to.
What do they both say about it?
- A It could have been clearer in places.
 - B It covered things they had struggled to understand.
 - C It held their attention throughout.
- 8 You hear a film-maker talking about her latest film.
What does she say about it?
- A It could be the best thing she's ever made.
 - B It marks a fresh direction in her film-making.
 - C It didn't quite turn out as she'd intended.

Part 2

You will hear a woman called Emma talking about upcycling furniture to make it look new again.

For questions 9–18, complete the sentences with a word or short phrase.

Upcycling furniture

Emma most appreciates the (9) nature of upcycling.

No special skills are needed but (10) is a crucial
part of the upcycling process.

In addition to using tools, such as paintbrushes, Emma also recommends using
(11)

Being (12) will help to give a piece of furniture
a new purpose or appearance.

Emma often goes to (13) to look for something
similar to what she's seen in a shop.

Emma believes that an upcycled item's (14) should
reflect its original appearance.

Emma says she prefers using types of colours that are
(15) rather than strong.

The furniture that Emma likes best is from what is known as
the (16) period.

Among decorative pieces that Emma has upcycled, she is most proud of
a (17)

Emma also suggests upcycling (18) furniture,
including seating and tables.

Part 3

You will hear five short extracts in which people are talking about when they learned to cook. For questions **19–23**, choose from the list (**A–H**) what each speaker says they enjoyed about learning to cook. Use the letters only once. There are three extra letters which you do not need to use.

A experimenting with unusual ingredients

B feeling a sense of connection to their background

Speaker 1

	19
--	-----------

C being able to choose food to suit their personal needs

Speaker 2

	20
--	-----------

D finding a way to switch off from everyday concerns

Speaker 3

	21
--	-----------

E developing the skills for a new career

Speaker 4

	22
--	-----------

F getting positive feedback from others

G recreating a dish they'd tried previously

Speaker 5

	23
--	-----------

H understanding how to create a balanced meal

Part 4

You will hear an interview with a marine biologist called Anna Masham, who does a lot of work with sharks. For questions **24–30**, choose the best answer (**A**, **B** or **C**).

- 24** How did Anna's family react when she decided to study marine biology?
- A** They were concerned about the dangers involved.
 - B** They were doubtful that she would enjoy the course.
 - C** They were worried about her employment prospects.
- 25** What does Anna say about the job she had straight after university?
- A** It confirmed she had made the right career choice.
 - B** It proved rather different to what she had expected.
 - C** It was a welcome opportunity to put theory into practice.
- 26** How did Anna feel on the first occasion she worked with a shark?
- A** eager to demonstrate she was capable
 - B** puzzled by her colleagues' instructions
 - C** nervous about how the animal might respond
- 27** Anna enjoys working with sharks because of
- A** their interest in people.
 - B** their elegance underwater.
 - C** their amusing behaviour.
- 28** What does Anna say about her career so far?
- A** Her determination has contributed to her success.
 - B** Her initial fear of criticism has faded away.
 - C** Her capacity for hard work has been valuable.

- 29 What strategy for protecting sharks does Anna intend to focus on?
- A producing accurate information about them for the general public
 - B encouraging people to see them in their natural habitat
 - C making people aware of their own negative impact on them
- 30 Anna believes that the best career advice she can give is to
- A develop good networking skills.
 - B keep up to date with relevant research.
 - C be willing to consider a variety of projects.
