

Test 4

READING AND USE OF ENGLISH (1 hour 15 minutes)

Part 1

Questions 1–8

For each question, choose the correct answer.
Mark your answers **on the separate answer sheet**.

Making oxygen on Mars

A small device no bigger than a toaster has generated oxygen from the atmosphere on the surface of Mars, bringing the **1** of humans surviving on this hostile planet a step closer.

The Mars Oxygen In-Situ Resource Utilization Experiment, better known as Moxie, has produced breathable oxygen in seven hour-long tests **2** in various weather and atmospheric **3** During each test, the device produced 6 grams of oxygen, as much as a small tree does on Earth and enough to support an astronaut for 15 minutes. Even in **4** temperatures, and after a Martian dust storm, Moxie continued to produce high-purity oxygen.

This is the first **5** of resources on the surface of another planet being chemically **6** into something that would be useful for a human mission there. The researchers are **7** planning to build a larger version of Moxie. They hope advanced models will be able to produce enough oxygen to support the **8** human crew of a Mars mission.

Test 4

| 8 | A | entire | B | absolute | C | overall | D | total |

Part 2

Questions 9–16

For each question, write the correct answer.

Write **one** word for each gap.

Write your answers **IN CAPITAL LETTERS** on the separate answer sheet.

Time capsules: souvenirs of the past

Time capsules have proved popular for many years. They generally consist of a container filled with items aimed at showing **9** our everyday lives are like. This container is then buried in the hope that it will be discovered decades from now.

However, time capsules sometimes get dug up long **10** the intended date, because of construction work. This happened to a particularly interesting capsule, the contents of which had been chosen by viewers of a children's TV programme. **11** of the items inside the capsule was the photo of a girl **12** grandfather had also enclosed a letter about the changes he'd witnessed in his lifetime.

The plan had been **13** the capsule to remain buried for 50 years. However, while excavating the area, builders accidentally came **14** it too early and unfortunately broke it. In **15** of the fact that the capsule was damaged, it was still reburied with new items added, and **16** not due to be unearthed again until 2050.

Part 3**Questions 17–24**

Read the text below. Use the word given in CAPITALS on the right to form a word that fits in the gap.

Write your answers **IN CAPITAL LETTERS** on the separate answer sheet.

A new species of owl

Bird lovers were recently excited to learn about the discovery of a new type of owl, native to Principe, an island off the west coast of Africa. The species was found in a remote corner of the island where there are no human **17**

This species has now been **18** named the Principe scope-owl by experts, whose **19** is that there are between 1,000 and 1,500 of these birds in **20** This unique species of owl is thought to be confined to the one small area of Principe and to be **21** on the distinctive forest environment there. Conservationists have made a strong **22** to the island authorities that the forest should become a protected area.

As owls are nocturnal, researchers are gaining substantial benefits from using modern night-vision camera technology to observe the Principe scope-owl's **23** They are hopeful that this will provide an interesting **24** into the life of this newly discovered species.

Part 4

Questions 25–30

For each question, complete the second sentence so that it means the same as the first, using the word given. **Do not change the word given.** You must use between **two** and **five** words, including the word given.

Write **only** the missing words **IN CAPITAL LETTERS** on the separate answer sheet.

- 25 I think the tables in this restaurant are too close together.

APART

The tables in this restaurant ought , I think.

- 26 Put an extra blanket in the guest room, as your cousin might find it cold there at night.

CASE

Put an extra blanket in the guest room it cold there at night.

- 27 I couldn't buy the shoes I liked because I didn't have enough money.

WOULD

If I'd had enough money, the shoes I liked.

- 28 It was Mark's responsibility to solve the problem with the lost cinema tickets.

RESPONSIBLE

Mark was out the problem with the lost cinema tickets.

- 29 My teacher said we should make the most of the nice weather while it lasted.

ADVANTAGE

My teacher encouraged of the nice weather while it lasted.

- 30 We will only hold the end-of-term concert if enough students want to take part.

AHEAD

The end-of-term concert unless enough students want to take part.

Part 5

Questions 31–36

Read an article about a clown. For each question, choose the correct answer.
Mark your answers on the separate answer sheet.

The life of a clown

Alison Klein meets a professional clown called Harry Hammer.

Harry Hammer enjoys showing me his pictures of clowns past and present. One photograph in particular catches my eye. For many years, Jack Lane was the UK's most famous clown in an era when attitudes towards clowns were very different from now. He was invited to visit schools around the country and appeared on numerous TV shows, promoting causes like road safety. 'Jack Lane was from my grandparents' generation,' Hammer says, 'but he was a hero for many younger clowns – including me. These days, I doubt whether kids, or anyone else, think they should listen to a clown saying be careful crossing the road.'

Hammer has been a professional clown for over 20 years. Unlike Jack Lane, he must now **take steps** to prove to those he performs for that he doesn't represent a threat. When I visit him, he's preparing for a performance at a six-year-old's birthday party. 'I'll have selected my clown clothes and shoes, and have them on before I get to the party,' he says. 'But to avoid any problems, I'll paint my face when I'm there, so the kids can see.' He's keen to make it clear he's a normal, friendly person behind the mask.

Hammer recalls falling in love with clowning as a child. He would join hundreds of clowns for an annual parade through the streets of his home town. Those experiences shaped his view that clowning is an art form anyone can enjoy. 'I'm still convinced that's true,' he says. He's performed in offices, shopping malls, at weddings and sports events; the list is endless. Nowadays, he mainly tours schools, but wherever the performance might be, he tries to capture the innocent spirit of the clowns he was first inspired by. 'There's also a place for the darker types of clowning,' he says, 'but they're not my thing.'

The last 30 years have seen great commercial success for films and TV series featuring scary clown characters. During that period, the

media has reported incidents of people wearing clown masks and deliberately frightening people in public places. 'One survey found that 20% of people in the UK are afraid of clowns,' says Hammer. 'What they've been watching has presumably got something to do with it. This fear has reduced the demand for entertainers like me. At times, I've wondered whether I should just give up. Clowning's an ancient art, though, and there've always been both good and evil clown characters – always with white faces and red noses. All I can do is try to get better at what I do – to be the best possible happy, innocent clown.'

When I ask Hammer if clowning has a future, he shows me a magazine article published in 1964 with the title *Will TV cause the end of clowning?* 'Trends may come and go,' he says, 'but clowning will always be here.' He mentions the enduring popularity of the TV presenters Rosie and Lee. 'They've been presenting different programmes for over 20 years, but their routines, their jokes and the way they tell them are still very similar to what circus clowns used to do,' he says. 'TV viewers don't make the connection because they're not wearing white paint and red noses.'

When I speak to Hammer a few days later, I ask him about the six-year-old's party. 'Some of the kids seemed nervous at first,' he says. 'I used a range of jokes, tricks, songs and games, and by the end most of them seemed very happy.' He ended the show with a face-painting session. Several of the children asked to be pirates or superheroes, but a number requested a white face and red nose. 'Considering they could've asked for just about anything,' says Hammer, 'that's the best compliment I can imagine. A few more bookings to see me and hopefully be entertained could well come from that party.'

31 What does the writer emphasise about Jack Lane?

- A the ability he had to communicate certain ideas
- B the amount of respect that people had for him
- C the concern he showed for children's welfare
- D the way he advised others in their careers

32 The words 'take steps' refer to Hammer

- A putting make-up on in front of his audience.
- B covering up his true identity when he's at work.
- C choosing what to wear for a particular occasion.
- D planning the entertainment for a younger age group.

33 In the third paragraph, we learn that Hammer believes clown acts

- A should focus on making people feel good.
- B can play an important role in education.
- C need to adapt to changes in society.
- D continue to have universal appeal.

34 How does Hammer feel about scary clowns in popular culture today?

- A surprised at the level of attention they have received
- B irritated by the way they ignore the traditions of his craft
- C concerned about how they can affect his way of life
- D unsure why their numbers have increased so much

35 Hammer's view of the TV presenters Rosie and Lee is that they

- A have helped cause the decline of his own profession.
- B would be funnier if they changed their appearance.
- C are a modern version of traditional entertainment.
- D have had more success than they deserve.

36 In the final paragraph, what compliment did the children at the birthday party give Hammer?

- A Some asked if they could watch him perform again.
- B They quickly forgot about any anxiety they'd felt.
- C They agreed to have their faces painted.
- D Some said they wanted to look like him.

Part 6

Questions 37–42

Read an article about scientists using sharks in research they are doing on seagrasses. Six sentences have been removed from the text below. For each question, choose the correct answer. There is one extra sentence which you do not need to use.

Mark your answers **on the separate answer sheet**.

How tiger sharks helped scientists to study seagrasses

If you were swimming in the sea and saw a tiger shark heading towards you, the best advice would be to get out as fast as possible. Over five metres long when fully grown, tiger sharks are aggressive predators; they're famous for eating just about any creature they find or are able to capture. But a team of researchers have recently made use of some tiger sharks to carry out a study of seagrasses.

Seagrasses are flowering plants that grow across large parts of the seabed in shallow and coastal waters. 'We use the term "seagrass meadows",' said Dr Maria Cassidy, one of the researchers. 'These meadows are like enormous fields of grass at the bottom of the sea and are extremely important. **37** An obvious one, if you see them close-up, is that all sorts of fish and other creatures like turtles and seahorses shelter in them.'

Seagrasses slow down currents and waves, and, as a result, they protect coastlines from storms and rising sea levels. 'Seagrasses also absorb large amounts of carbon from the surrounding seawater,' said Dr Cassidy, 'and this ultimately reduces the speed of climate change. **38** It's been estimated that 7% of seagrasses are lost globally every year.' This is due to pollution, large-scale commercial fishing, coastal construction projects and extreme weather.

In order to protect seagrass meadows, scientists first need to understand what they're dealing with. 'We've known for a long time that the waters around the Bahamas in the Caribbean have seagrass meadows, for example,' said

Dr Cassidy, 'but we didn't know how big they were.

39 This is partly due to the fact that images of seagrass from planes and satellites tend to be very unclear. And sending divers down to photograph the ocean floor is expensive and inefficient.'

Tiger sharks are a different story, however. 'While human divers can only tolerate adverse sea conditions for limited periods of time,' Dr Cassidy explained, 'sharks live there permanently. **40** And we know they cover large distances every day.' Tiger sharks are also naturally attracted to seagrass meadows because of the food supplies to be found there.

With the help of shark experts, Dr Cassidy's team captured seven wild tiger sharks from the sea near the Bahamas and attached special camera equipment, with satellite and radio tags, to their fins. The sharks were then released back into the sea. 'We tracked them travelling up to 70 kilometres a day,' Dr Cassidy said, 'and we received masses of data, as well as film of seagrass meadows. **41** In fact, we've worked out that about 92,000 square kilometres of the Caribbean seabed is covered by seagrasses.'

These findings are very significant. 'If we know exactly where the seagrass meadows are,' Dr Cassidy says, 'we know what we need to protect. **42** And there's reason to be optimistic that we will. Furthermore, using tiger sharks as successfully as we did suggests that other species could also help us to investigate the world's seas and oceans.'

- A** It's essential that more resources are focused on gathering information about them as well.
- B** Getting accurate information about that can be extremely challenging.
- C** Were we to locate them all, that would be a great step forward.
- D** They help protect the oceans and the wildlife living there in a number of different ways.
- E** All the evidence suggests these are far more extensive than previously thought.
- F** What's worrying, though, is that in many areas their survival is threatened.
- G** Rough and stormy weather makes very little difference to them.

Part 7

Questions 43–52

Read an article about acting in video games. For each question, choose the correct section. Each section may be chosen more than once.

Mark your answers **on the separate answer sheet**.

What it's like to be an actor in a video game

Four people who are involved in making video games discuss how they provide the movements and voices of the characters in the games.

A

In order to film action scenes for video games, actors wear very tight-fitting performance-capture body suits which are covered in sensors to record their movements. They're not flattering, but according to actor Rob Manly, the larger issue is the high-definition camera fixed to a tripod on the helmet each actor also has to wear. It points into their faces to capture their expressions. 'Video games are far more challenging for actors than cinema for a number of reasons, but that's the biggest frustration,' says Manly. 'If that was present on a movie, you'd go crazy. But in our job, we realise that whether you like it or not, it's there and you have to focus on your scene partner's eyes to filter it out.'

B

Most performers compare the experience of acting in a video game to theatre. There's that same sense of having to mentally transform a bare space into a real location, and then project that to the audience; there's a lot of talk about creating the world in your own head and relying on eye contact with other performers. It seems those who do it are a close group who feel comfortable with each other and have fun together. 'With games, we actually have rehearsal time,' says actor Liam Mackenzie. 'And the developers are very open to us offering thoughts for the characters and their dynamic.' As in classical theatre, video-game acting demands that actors give 'bigger' performances with more pronounced gestures, because the motion-capture process can lose, or entirely miss out on, very subtle physical gestures.

C

'We're capturing a certain kind of physicality,' says head writer Stephan Hubert. 'An actor may have a great physique, a good voice, whatever, but they might have a certain walk or hold a weapon in a weird way,

and you don't want to capture that. One thing we think about is using clear, determined movements – if an actor has to pick something up from a table, they need to walk over, plant themselves, reach down, pick it up and look at it. Fluid, subtle movement works in a film because it looks natural, but video games are different.' Mackenzie definitely sees the similarities with stage performance. 'The importance of finding each other's eyes, ignoring the distractions of the tech. It's very similar to theatre. In fact, it's like acting in those theatres where the audience sit all around the stage, in that there's nowhere to escape to. You can't turn away from that camera ever, you can't move a muscle without it being picked up. It's just something you get used to that you don't even notice after a while.'

D

The process of capturing exciting physical sequences in a motion-capture studio is often highly improvisational – the team has to work with whatever's available. Mackenzie recently played a character who was hanging upside down out of a helicopter. The studio had some large gym balls lying about, so Mackenzie ended up lying backwards over one to deliver his lines. 'It's important,' he says. 'Your voice, the feeling of blood rushing to your head – those details matter.' 'The actors really have to have faith that the studio will fine-tune their performance and turn it into something that looks convincing,' acknowledges narrative director Marcus Cowley. 'That's what this is all about – trying to capture human experiences as realistically as possible and transmit them into a game.' Another element actors have to master is recording exertion noises. In games, every time the player climbs a wall, jumps down off a ledge or gets injured, the character will groan, gasp or yell out in pain – dozens of these noises need to be recorded by the actors to avoid too much repetition.

Which section contains

the view that suggestions from actors are well accepted?	43
a mention of something the actors have to do multiple times in different ways?	44
the view that actors are unable to hide anything from the filming equipment?	45
a comment on the relationship between video-game actors?	46
the idea that looking right for a role sometimes isn't enough?	47
a complaint about a piece of equipment used in video-game acting?	48
a reference to the trust that actors need to place in the production team?	49
a step-by-step explanation of the way an action needs to be acted out?	50
a reference to the way actors need to imagine the scene they're acting out?	51
a mention of the lengths one actor went to in order to sound realistic?	52

WRITING (1 hour 20 minutes)

Part 1

Question 1

You **must** answer this question.

Write your answer in **140–190 words** in an appropriate style on the separate answer sheet.

- 1 In your English class you have been talking about young people's plans for their future. Now, your English teacher has asked you to write an essay for homework.

Write your essay using **all** the notes and giving reasons for your point of view.

'It's important for teenagers to have a clear plan for their future.' Do you agree?

Notes

Write about:

- what to study
- where to live
- (your own idea)

Part 2**Questions 2–4**

Write an answer to **one** of the questions in this part.

Write your answer in **140–190 words** in an appropriate style on the separate answer sheet.

Put the question number in the box at the top of the answer sheet.

- 2 This is an email you have received from your English-speaking friend, Zac:

Subject: Saving money

Hi!

I get pocket money every month, but I'm really terrible at saving it because I spend it on things I don't need. Can you give me any advice on the best ways to save money? Are there any things I can do to earn extra money?

Thanks,

Zac

Write your **email**.

- 3 You see this announcement on an English-language website:

Reviews wanted

GREEN SPACES

Write and tell us about a green space in your area that people can visit, for example, a park, a wood or some public gardens. Describe the place and say what you think of it. Who would you recommend this place to?

The best reviews will be posted on our website.

Write your **review**.

- 4 You have seen this announcement in an English-language magazine for teenagers:

Stories wanted

We are looking for stories for our new English-language magazine for teenagers. Your story must **begin** with this sentence:

Ben and Amy looked across the field and saw something moving in the distance.

Your story must include:

- a light
- a journey.

Write your **story**.

LISTENING (approximately 40 minutes)

Part 1

Questions 1–8

For each question, choose the correct answer.

1 You hear a boy talking about a weekend course he attended at a science museum.

What did he enjoy most about the weekend?

- A** taking part in a wide variety of activities
- B** spending time with his fellow students
- C** learning about a topic that has long interested him

2 You hear two friends discussing a new computer game.

What do they agree about it?

- A** It's one they'll remember.
- B** Its simplicity is part of the appeal.
- C** They can't wait to play it again.

3 You hear a girl talking to a friend about their homework.

What is she doing?

- A** outlining the approach she took to it
- B** describing a problem she's had with it
- C** recommending a quick way to complete it

4 You hear a teacher talking to his class about learning Chinese.

What is he doing?

- A** giving details of particular features the language has
- B** warning students how difficult the language is to learn
- C** encouraging a positive approach to studying the language

- 5 You hear two friends talking about holidays.**
They agree that their last holidays
- A** gave them a rest from their routine.
 - B** made them unwilling to return to their routine.
 - C** inspired them to change their routine.
- 6 You hear a teacher talking to his students about reading some poems.**
What does he want them to do?
- A** identify the locations referred to in the poems
 - B** select examples of interesting language in the poems
 - C** write a poem adopting a similar style to the author's
- 7 You hear a scientist talking about her observations of wild birds called jays.**
What particularly surprised her about their behaviour?
- A** They could remember exactly where they had hidden food.
 - B** They realised what to do in order to get their preferred food.
 - C** They knew which birds were likely to come and steal their food.
- 8 You hear two students talking about an art lesson they have just had.**
They both think the teacher's ideas
- A** turned out to be difficult to apply to their work.
 - B** gave the class valuable inspiration for their work.
 - C** introduced them to more abstract work than usual.

Part 2

Questions 9–18

You will hear a girl called Anna giving a class presentation about a new leisure centre she went to recently. For each question, write the correct answer. Write a word or short phrase.

New leisure centre

Anna thought the leisure centre looked like a big **9** from the outside.

Anna uses the word **10** '.....' to describe the atmosphere at the centre when she first entered.

Among all the facilities, Anna hadn't expected to find a **11** at the top of the building.

Anna most enjoyed skateboarding on what she calls a **12** '.....' on the first floor of the centre.

The second floor was set up to look like a **13** for skaters to use.

Anna thinks that being able to see the views of the nearby **14** might have improved the centre.

Unfortunately, injuring her **15** meant Anna had to sit down for a while.

Anna says the main aim of the centre's designers was to provide an alternative to **16** for local teenagers.

Anna became interested in learning about the production of **17** at one of the centre's workshops.

Anna decided to decorate her skateboard with the image of a **18** after her visit.

Part 3

Questions 19–23

You will hear five short extracts in which teenagers are talking about photographs that have a special meaning for them. What does each speaker say about the photograph?

For each question, choose the correct answer.

Use each answer only once. There are three extra answers which you do not need to use.

Listening test audio

Speaker 1 **19**

Speaker 2 **20**

Speaker 3 **21**

Speaker 4 **22**

Speaker 5 **23**

- A** Few people get the chance to take a photo like this.
- B** This photo reminds me of a day when I made a major decision.
- C** I didn't realise that this photo was being taken.
- D** I didn't expect this photo to turn out so well.
- E** I was concerned about the subject of this photo.
- F** The photo was taken by a person who improved my life.
- G** Taking this photo led to a lucky opportunity for me.
- H** Looking at this photo immediately makes me feel calmer.

Part 4

Questions 24–30

You will hear an interview with a young woman called Clara Shenley, who is a games designer. For each question, choose the correct answer.

Listening test audio

- 24 Clara suggests that people are unaware that games designers need to be**
- A** open to different influences.
 - B** good at working in teams.
 - C** willing to work long hours.
- 25 Clara recommends that people interested in being games designers should**
- A** make contacts in the gaming industry.
 - B** choose an online degree course.
 - C** analyse the games that they play.
- 26 Clara believes that the biggest challenge for those in her industry is**
- A** creating a game which stands out from others.
 - B** finishing a game before the deadline.
 - C** getting sufficient publicity for a game.
- 27 What does Clara say about games designers playing games at work?**
- A** It encourages them to be competitive.
 - B** It helps them with problem-solving.
 - C** It's part of the fun environment they need.
- 28 What does Clara say about the design document?**
- A** It is relied on by some colleagues more than others.
 - B** It is on something boring that she has to work with.
 - C** It is necessary to update it on a regular basis.

29 In Clara's opinion, gaming is of particular value because it

- A** offers the benefits of travel without the disadvantages.
- B** provides players with a different perspective on things.
- C** connects people who are unable to meet in person.

30 What is the change that Clara would most like to see?

- A** games becoming more educational
- B** cooperative games becoming more popular
- C** people becoming more positive about gaming
